**Subject:** RE: Agenda for September 18 meeting with the state oil / gas directors

This is the revised agenda. It is still a draft document in that I am waiting to hear from the Railroad Commission if the EPA or State lead for the topics need to be changed. As I explained to Peter Pope at RRC, the lead is only designating who would start the conversation and not that it is a formal presentation. I would expect to have a “give and take” discussion on each of the topics.

As Sam requested at Senior Staff this morning, if short single paragraphs could be developed for the agenda items 3 thru 13 and provided to me by noon on Friday, there could be used to provide background information to the RA/DRA. In particular any insight into the topic and the expected state position would be helpful.

**Subject:** Agenda for September 18 meeting with the state oil / gas directors  
**Importance:** High

Received the input from the Railroad Commission, tasked with getting ideas from the other state agencies, late today. Items 3 thru 13 are the topics that the states would like to discuss next week. As expected, there is an emphasis on water and enforcement issues. Are there topics that you would like to add to the agenda or just cover under the “Brief Updates from the Region...” item?

We can discuss at tomorrow’s Senior Staff meeting or email me. I would like to finalize the agenda and issue it to the state participants by c.o.b., Wednesday.
